

Structure without purlins for PV kits

TreeSystem solar pumping products are applied discounts based on quantity of frames. Here the details:

Quantity of Frame	Discount	Unit Price per Frame
1-6 pcs.		€ 70,00
6-12 pcs.	5,00%	€ 66,50
12-24 pcs.	10,00%	€ 63,00
24-60 pcs.	15,00%	€ 59,50
60-100 pcs.	20,00%	€ 56,00
100-200 pcs.	25,00%	€ 52,50
200-500 pcs.	30,00%	€ 49,00
500-700 pcs.	33,00%	€ 46,90
700-1000 pcs.	35,00%	€ 45,50

Limitations of the system

Snow Load: maximum 140 daN/m² (ULS and not combined with wind load)

Wind Load: maximum 34 m/s (ULS and not combined with snow load)

The tilt of the system is fixed and it is 15° width of the modules should be between 990 mm and 995 mm

- * The snow and wind load values only refer to frame resistance. The resistance of the modules need to be considered from specification of manufacturer.
- * If there is combination of snow load and wind load, there must be an engineering calculation in order to define exact limit values of the system.
- * The soil condition has to be provided for the suitability of the foundations.
